

ESUG • 2026

The background features a stylized, light gray illustration of a stadium with tiered seating. In the center of the stadium, a hot air balloon is depicted with several vertical stripes in red, yellow, blue, and teal. The text "Welcome to your conference" is overlaid in the center of the image in a large, bold, black font.

**Welcome to your
conference**

Thanks for IWST

- This year 23 submitted papers!
- Thank you for sending your articles
- A huge success!

Thanks for the special issue

- Having a special issue is just great!
- This community has excellent ideas, let us publish them
- Please send paper to the Special Issue
- Now COLA is Q2

Thanks for organizing IWST/Sp

- Thanks for your time organizing IWST
- Thanks for organizing the special issue

Special thanks for Peter

- I want to give a ***super special*** thanks to Peter
- Peter offered to sponsor Anas, an Egyptian student
- Visa problem, Anas will not be with us
- Trying to set up some lectures with Anas' university

This year

Following the new format

summer school + conference + workshop

74 registered participants

15 student volunteers

A superb program

A guide of conduct

Make this conference a nice place

Read the conduct guide

Smalltalk anthology

https://hal.science/SMALLTALK_ANTHOLOGY

The screenshot shows a web browser window displaying the HAL page for the 'Smalltalk books anthology'. The browser's address bar shows the URL 'hal.science/SMALLTALK_ANTHOLOGY'. The page header includes the HAL logo, a search bar, and a '+ Upload' button. The main title 'Smalltalk books anthology' is prominently displayed. Below the title, there are navigation tabs for 'Homepage' and 'Contents'. The main content area contains several paragraphs of text about the Smalltalk language and the anthology. On the right side, there are widgets for 'Notices' (showing 0), 'SHERPA/RoMEO', and a search bar for 'Open Policy Finder'.

Smalltalk books anthology

Homepage Contents

Smalltalk is a language that revolutionized programming languages. It was developed at Xerox PARC Palo Alto by the team led by A. Kay and D. Ingalls. I cannot thank them enough for their work and inspiration. I assembled this collection as a tribute to them and all the people who contributed to Smalltalk.

As a Pharo visionary, Pharo (<https://www.pharo.org>) is proud to have such a lineage - we built Pharo on the shoulders of giants. Now Pharo's goal is not to be just a Smalltalk - the goal of Pharo is to bring the idea of Smalltalk and revisit the language infrastructure. This is clearly a large endeavor with the responsibility to honor such community.

This collection brings together a set of old books that are no longer in print. These scanned books were donated by the authors/publishers to be included in this list. This collection was created by S. Ducasse and is supported by ESUG <http://esug.org>. The list was originally hosted at <http://stephane.ducasse.free.fr/FreeBook.html>. A new version is available at <http://stephaneDucasse.github.io/freebooks.html>.

I would like to thank all the authors of the books for their support and for allowing future programmers to learn about the history of a brilliant language. If you have more books for this collection, please contact me at stephane.ducasse@inria.fr
